

# Inala's COVID Safe Plan

To help ensure all members of the Inala community stay healthy we are adhering to Public Health Orders, following guidance from NSW Health for disability care providers and the following COVID related protocols:

## **Social distancing**

Following social distancing guidelines and providing training for staff and clients to maintain 1.5m distance. Information about safe capacity for each space is clearly displayed

## **Personal hygiene**

Reinforcing good hygiene and handwashing practices with training and support. Hand sanitiser is readily available and PPE is available with how to use training

## **Monitoring health**

Daily monitoring of potential symptoms for clients, staff and visitors as well as temperature checks for all service areas and visitors

## **Cleaning**

Enhanced hard surface cleaning throughout all homes to help reduce the spread of germs

## **Stay at home if unwell**

Clients and staff are aware to stay at home if feeling unwell or experiencing any flu like symptoms. They are unable to return to work or services until receiving a negative test for COVID-19

## **Engaging with the community**

Ongoing evaluation of community based activities and monitoring visitors for potential symptoms or activity within identified high risk suburbs, areas and venues

## **Communicating**

Keeping clients, families and staff up to date with changes to support and service routines as well as information on new protocols in place

## **Planning and review**

Regular pandemic meetings, review of government information to ensure all public health orders are upheld, as well as assessing the risk of clients and staff depending on health and vulnerability

## **Working From Home**

Staff who are able to reasonably work from home have been instructed to do so in line with government directives

## **Vaccination**

Encouraging and supporting COVID-19 vaccination
